Many people don't completely understand the energy tax credits that are available to them through the end of 2010. The Kansas City Star published a nice article detailing what qualifies for the energy tax credit. And no, it's not all furnaces and water heaters – think doors, windows, and even window coverings!

Take a look at the article [here](#) to see if the home improvement projects you completed in 2009 are eligible or before you decide to do any new projects.

Happy Updating!
